GENERAL
The 730WB Prairie Wall Fixture is a medium scale, dramatic Wrightian/Mission squared edge design. It features tall, straight four-sided decorative cast cage, a unique tree design grille, ballast assembly, acrylic lens and a dramatic cantilever peaked roof design.

WALL MOUNTING STYLES
The 730WB shall be Surface Mounted to wall to minimize projection. It shall have a 9 1/2” projection from the wall.

The 730/HMA3WB shall be Wall Mounted with the fixture hung below the decorative cantilever arm and ring finial. It shall have a projection of 15 1/2” from the wall.

The 730/77WB shall be Wall Mounted with traditional 10 1/2” long cast aluminum wall plate. It shall have a 14 1/2” projection from the wall. The 730/TPS3 shall be Wall Mounted with the fixture hung below the downswept arm. It shall have a 15 1/2” projection from the wall.

FIXTURE HOUSING
The housing body shall be made of 7” square 3/16” wall aluminum one-piece extrusion. A welded housing body shall not be acceptable. The fixture features windows with cast tree design grille work. The cast 12” square roof shall cantilever the fixture body and have a solid aluminum soffit.

ELECTRICAL
Fixture shall be U.L. or E.T.L. listed in U.S. and Canada. H.I.D. ballasts shall be high power factor with lamp starting down to -30 degrees C. Medium base porcelain sockets are 4KV rated. The ballast/socket assembly shall be pre-wired when ballast is located in the fixture housing. All compact fluorescent (PL) ballasts shall be instant start electronic with a starting temperature of down to 0 degrees F. They shall have a 4-pin socket to accept quad or triple tube lamps. Incandescent and compact fluorescent assemblies can be specified as open bottom for additional downlight. Ballasts shall be DOE EISA compliant.

OPTICAL / LENSES
The 730WB series comes standard with white lens made of one piece 1/4” thick square heavy-duty acrylic. Optional lenses are available.

FINISH
Prior to coating, each assembly shall be chemically cleaned and etched in a 5-stage washing system which includes alkaline cleaning, rinsing, phosphoric etching, reverse osmosis water rinsing, and non-chrome sealing to ensure corrosion resistance and excellent adhesion for the finish coating. The finish coating shall be electrostatically applied semi-gloss, super durable polyester powder baked at 400 degrees for a durable and superior, color retentive finish. Our optional antique Verde Green finish and Swedish Iron finish are hand brushed using a 3-step process. The total assembly shall be wrapped in shockproof wrapping or fully enclosed in corrugated cartons.

WARRANTY
Five-year limited warranty. See product and finish warranty guide for details.

**NOTES:**

1. 35HPS is 120 volt only
2. Medium base sockets for HID. 4-pin for PL.
3. 70 watt HID maximum
4. Not available for 700WB
5. Refer to chart on following page for maximum wattage for each fixture.
6. Metal halide systems are pulse start.
