GENERAL
The A753/A755 Columbia series is a stylized Victorian acorn fixture which consists of a decorative cast aluminum fitter, cast ballast housing assembly and a high efficiency polycarbonate or acrylic prismatic acorn globe. It shall be appointed with a cast aluminum decorative 4-vane finial.

FITTER - STANDARD
The fitter shall be heavy wall cast aluminum, 356 alloy for high tensile strength. It shall have an 8 1/2" inside diameter opening to attach to the 8" neck of the acorn globe. When ordered with a Sternberg aluminum pole, the fitter shall be welded to the pole top or tenon for safety and to ensure the fixture will be plumb, secure and level over the life of the installation. The fitter shall have a one-piece ring bug gasket to resist insect penetration into lamp assembly.

STANDARD FITTER-TL FOR QUICK & TOOL-LESS REMOVAL OF ACORN
The fitter shall be heavy wall cast aluminum, 356 or 360 alloy for high tensile strength. It shall have an 9 1/4" inside diameter opening to attach to the 8" neck of the acorn globe. When ordered with a Sternberg aluminum pole, the fitter shall be set screwed to the pole top or tenon. The fitter shall have an aluminum die cast twist-lock mechanism for tool-less, ¼ turn installation and removal of acorn globe. The acorn is provided with a die cast mating collar which is easily removed and reused if acorn replacement is ever performed.

990 FITTER SERIES OPTION
The fitter shall be heavy wall cast aluminum, 360 die cast alloy for high tensile strength. It shall have a 9 1/4" inside diameter opening to attach to the 8" neck of the acorn globe. It shall have a hinged, tool-less entry door that provides open access to all of the components. The 990 shall have an optional terminal block for ease of wiring, an optional Twist-Lock Photocell receptacle, an optional single GFCI outlet for auxiliary power needs. The top mounted ballast mounting plate shall be cast aluminum and provide tool-less removal from the housing using 2 finger latches. When ordered with a Sternberg aluminum pole, the fitter shall be set screwed to the pole top or tenon. The fitter shall have a one-piece ring bug gasket to resist insect penetration into lamp assembly. When supplied with GFI receptacle a hole will be provided for cord and plug installation with the access door closed. When cord and plug is not in use a filler plug will be provided and shall be tethered to the fitter for easy recovery and installation.

990 TL FITTER (OPTIONAL)
The TL (Twist-Lock) fitter version of the 990 shall have an aluminum die-cast twist-lock mechanism. The tool-less 1/4 turn action allows for easy globe removal and replacement. A die-cast ring assembly is mechanically attached to the globe and is removable if the globe is broken or replaced.

EPA = 1.88 (ft²)
WEIGHT = 28 LBS

- Quartz Re-Strike (QR)
- Pineapple Finial or Font (PF)
- Ball Finial or Font (BF)
- Select from List (LAMPS)

**Notes:**
1. A 35HPS is 120 volt only.
2. Medium base sockets standard with ballasts up to 150 watts. Mogul base sockets are standard with ballasts 200 watts HID and over.
3. For 990 or 990T series fixture only.
4. Metal halide systems are pulse start.

11-13
**ELECTRICAL**

Fixture shall be U.L. or E.T.L. listed in U.S. and Canada. H.I.D. ballasts shall be high power factor with lamp starting down to -30 degrees C. Medium base and mogul base porcelain sockets are 4KV rated. The ballast/socket assembly shall be pre-wired when ballast is located in the fitter. Ballasts shall be DOE EISA compliant.

**ACORN GLOBE**

The prismatic acorn globe shall be 16” in diameter and 32 3/4” tall with an 8” aluminum neck. It will be made of vandal resistant prismatic polycarbonate or dent resistant (DR) prismatic acrylic. The acorn globe can be specified in either an I.E.S. Type 3 (Model A753) or Type 5 (Model A755) light distribution. The optional (CDR) is a heavy cast aluminum ring with four cast medallions finished in accent gold. Also available are custom medallions that can be specified with a name, initial or logo.

**OPTICAL**

The prismatic acorn globe can be specified with an optional reflector (RSC) which will provide a semi cut-off light effect. This will provide reduced up-light and improved downward efficiency. **House Side Shield** (HSS) is an option that will block 120° of light in any one direction.

**QUARTZ RE-STRIKE**

The A753/A755 fixture can be supplied with an optional quartz re-strike system to retain constant fixture light if the H.I.D. lamp fails. The fixture will be equipped with a 100 watt quartz lamp and a controller to run on a 120 volt circuit and must be used in conjunction with a 120 volt or multi-tap ballast.

**PHOTOCELLS**

Photocells shall be either the thermo bi-metal button type or the electronic button type. On single post top fixtures the photocell shall be mounted in the fitter and pre-wired to ballast. On multiple head fixture assemblies photocells shall be mounted in the pole shaft on an access plate and are not pre-wired as ballast housing assemblies and fitters are packaged separately for ease of wiring to source. The thermo bi-metal photocell shall be designed to turn on at 1.0 footcandle and turn off at not more than 5 footcandles. The electronic button type photocell is instant on and a 5-10 second turn off and shall turn on at 1.5 footcandles with a turn-off at 2-3 footcandles. Photocells are either 120 volt or 208 thru 277 volt.

**ARMS**

All arms are made of cast aluminum and/or extruded aluminum. Arms with decorative filigree have meticulously detailed scroll work and gracefully curved brackets. All A753/A755 fixtures will have its fitter either welded to the arm or will be mechanically attached at the factory to ensure arms will be plumb, secure and level over the life of the installation. Each arm shall be bolted to a post mount adapter, which is welded to the pole to ensure proper alignment to the base. Twin TA, TASCRC and 579 arms will be attached to a decorative center hub which will slip-fit the center tenon of the pole (not shown). BA and 779 arms are available as a twin application. Arms are pre-wired for ease of installation.

**FINISH**

Prior to coating, each assembly shall be chemically cleaned and etched in a 5-stage washing system which includes alkaline cleaning, rinsing, phosphoric etching, reverse osmosis water rinsing, and non-chrome sealing to ensure corrosion resistance and excellent adhesion for the finish coating. The finish coating shall be electrostatically applied semi-gloss, super durable polyester powder baked at 400 degrees for a durable and superior, color retentive finish. Our optional antique Verde Green finish and Swedish Iron finish are hand brushed using a 3-step process. The total assembly shall be wrapped in shockproof wrapping or fully enclosed in corrugated cartons.

**WARRANTY**

Five-year limited warranty. See product and finish warranty guide for details.
