

14 LITTLE REASONS TO SPECIFY STERNBERG

- 1** Sternberg Lighting designs and builds the most robust LED optics in the industry. Longevity and optical performance are unmatched providing efficiently designed products that give the customer life-long value.
- 2** Sternberg Lighting provides glare relief with Soft Vue™ lenses giving unparalleled visual comfort without distorting lighting distribution patterns of LED optics.
- 3** Decorative aluminum pole bases are cast in 1-piece having an integral floor. There are no welded-in floors, thus providing strength and durability for years to come.
- 4** We double circumferentially weld most of our pole assemblies to ensure strength, transmit wind load effectively and to increase longevity.
- 5** Our acorn ballast fitters are leveled and welded to the pole shaft. This method ensures stability, avoids fixture wobble and prevents fixture assembly from becoming a projectile if hit by a vehicle.
- 6** All exterior fasteners are stainless steel and their heads are painted to match the pole finish. There will be no bright stainless sparkle to ruin the appearance of the finish.
- 7** Pole base access doors are, in most cases, designed with a single center screw and bar clamp so that each door can fit any base casting. Hardware is treated with an anti-seize compound to ensure easy removal and installation.
- 8** Our 6-step polyester powder coat finishing process meets or exceeds all guidelines set forth by the Polyester Powder industry to ensure longevity and durability of our coatings application. We even coat the inside of our pole bases.
- 9** Sternberg wraps poles and fixtures not only in stock packaging, but also fully cartons the product to ensure damage-free shipping.
- 10** Sternberg's name is cast into every pole base for future identification. Years from now we will be here to service the products we build for you today.
- 11** Our Verde Green and Swedish Iron finishes are still hand applied using our legendary 3-step antiquing method.
- 12** Sternberg's driver and ballast housings are engineered to draw heat away from sensitive electronic equipment thus ensuring long and reliable service life backed up by the best warranty in the business.
- 13** Sternberg Lighting is nearly a century old and is 100% Employee owned and operated. Our company has a proven track record of quality and performance.
- 14** Sternberg Lighting has the best custom and modified standard product capabilities in the decorative outdoor lighting market.
