

retrofit

Sternberg Lighting's versatile XRLED Post Top conversion kits are designed to transform existing Sternberg conventional lamp luminaires into energy-efficient solutions at significantly reduced maintenance costs. We've designed, developed and tested our XRLED kits specifically for Sternberg luminaires. You'll be assured maximum light output and energy savings, proper thermal management, proper aesthetic appearance, reliable trouble-free upgrading and support. The wide variety of lumen and distribution options makes upgrading existing Sternberg installations a snap.
