

Prairie

Prairie

Inspired by the Arts and Crafts movement of the early 1900s, Sternberg created the versatile Prairie family of luminaires. Rooted in the pre-modern period prior to 1930, the style stood for traditional craftsmanship with simple, elegant forms. It is undeniable that the Prairie family was strongly influenced by Frank Lloyd Wright's architecture, patterned after the low sloping roof lines and subtle decorative elements.

Styles

Prairie is a dynamic family, spanning multiple form factors, each perfectly scaled to fit varied applications. Numerous mounting options enable designers and architects with the flexibility to choose from post top, side arm, wall, pier and pendant luminaires. Prairie's character and versatility is equally at home in parks, streetscapes, retail and other commercial installations, paired with a simple square pole or rustic wooden structure as shown on page 4.

QUICK FACTS

- Prairie luminaires can be fitted with various lens options including art glass.
- Decorative window grilles can be optioned and custom designs are also available.
- Family members include Bollards and stem/chain hung models.

Features

Prairie is manufactured from heavy cast aluminum components and can adapt to multiple types of light sources, optics and lenses. Optional decorative chimneys can be lit or unlit. Many models scale from small, medium, and large luminaires including bollards, wall mounts, post top and pendant chain or stem hung versions. Square and round form factors complete the product offering.

Grille Art

The Prairie family of products is perfect for customization and personalization. Each project needs its signature and the theme of any project can be reflected in the beautiful window grilles of the Prairie family of luminaires. Grilles and door frames can be cast or water jet cut to customer or designer specification. When paired with art glass each piece of grille art comes alive with the image and style the designer has envisioned.

Details as intricate as the grape cluster, (shown left), can be enhanced by adding a custom paint application.

Custom grilles can be strictly art or simply a visual cue to the environment. Experts at Sternberg can consult on design ideas. Give our team a call with your ideas and we will transform your concept into reality.

**Located in Roselle, Illinois
Engineered, Tested and Assembled in the USA!**

Sternberg is a market leading provider of decorative outdoor luminaires, poles and smart city solutions with a legacy of durability and craftsmanship dating back to the company's founding in 1923.

Blending technology and style, our specification grade products are featured design elements throughout downtowns, parks, campuses, roadways and retail centers across North America. Designed and manufactured to demanding quality standards, precision optics, LEDs and controls are integrated to deliver on the demands of environmental sustainability and energy conservation. Sternberg serves the Municipal, Utility, DOT and Commercial markets.
